      <h2>Giraffes</h2>
      <h3>Giraffe facts:</h3>
      <p>
        giraffe, (genus Giraffa), any of four species in the genus Giraffa of
        long-necked cud-chewing hoofed mammals of Africa, with long legs and a
        coat pattern of irregular brown patches on a light background.
Giraffes
        are the tallest of all land animals; males (bulls) may exceed 5.5
metres
        (18 feet) in height, and the tallest females (cows) are about 4.5
        metres.

      <h2>Lions</h2>
      <h3>Lion facts:</h3>
      <p>
```
```html
      The lion (Panthera leo) is a large cat of the genus Panthera native to
      Africa and India. It has a muscular, broad-chested body; short,
rounded
      head; round ears; and a hairy tuft at the end of its tail. It is
      sexually dimorphic; adult male lions are larger than females and have
a
      prominent mane.

    <h2>Monkeys</h2>
    <h3>Monkey facts:</h3>
    <p>
      Monkey is a common name that may refer to most mammals of the
infraorder
      Simiiformes, also known as the simians. Traditionally, all animals in
      the group now known as simians are counted as monkeys except the apes,
      which constitutes an incomplete paraphyletic grouping; however, in the
      broader sense based on cladistics, apes (Hominoidea) are also
included,
      making the terms monkeys and simians synonyms in regards to their
scope.

    <h2>Alligators</h2>
    <h3>Alligator facts:</h3>
    <p>
      alligator, (genus Alligator), either of two crocodilians related to the
      tropical American caimans (family Alligatoridae). Alligators, like other
      crocodilians, are large animals with powerful tails that are used both
      in defense and in swimming. Their eyes, ears, and nostrils are placed on
      top of their long head and project slightly above the water when the
      reptiles float at the surface, as they often do.
